

ASEM LIFELONG LEARNING, IRELAND
(A NETWORK OF ASIAN AND EUROPEAN HIGHER EDUCATION INSTITUTIONS)
E-ASEM RESEARCH NETWORK (RN1)
GLOBETHICS SOUTH ASIA CENTRE, BANGALORE

jointly organise

An International Virtual conference on
Artificial intelligence and Ethical Leadership in Education
*(A programme for faculty, academic administrators, curriculum designers,
educational policy makers and research scholars)*

Prof. Seamus O Tuama
University College Cork, Ireland
Chair, ASEM LLL Hub,

Ms. Christine Housel
Donor Relations and Strategic Partnership,
Globethics, Geneva, Switzerland

Rev. Dr. Jose Nandhikkara,
India National Director,
Globethics South Asia Centre
Bangalore

Prof. K. Pushpanadham,
The M.S. University of Baroda, India
Coordinator, E-ASEM Research Network

Dr. Fadi Daou,
Executive Director,
Globethics, Geneva, Switzerland

Dr. Muhammad Helmi Norman
Universiti Kebangsaan Malaysia

Dr. Luis Miguel Cardoso
Universiti of Lisbon, Portugal

Dr. Jenne Pange
University of Ioannina, Greece

For Registration: [CLICK HERE](#)

No registration fee

E-certificate will be provided to all the participants

Date: 09 September 2023

Time: 01.00 to 04.00 pm IST

Concept:

Digital learning has become a new normal and the world has been moving towards a digital future. One of the most potential and prospective of these is artificial intelligence (AI). Artificial intelligence is the capability of machines to communicate with and imitate the capabilities of humans. Using AI helps in problem solving with higher accuracy, higher speed and a larger scale. AI technology is emerging as a competitive advantage. In this regard, many companies including education sector are shifting from remote monitoring to control, optimization and advanced autonomous AI-based systems to improve their functionality. Along with its rising importance in Education, AI shows an increasing and broader presence in the scholarly discourse, and this presence has affected many fields, such as teaching, research, innovation and community outreach. AI is now researched from a more holistic perspective for quality education. The international webinar deliberates on AI in Education and explore the possible areas for collaborative research and development.
