

CHILD IN A DIGITAL WORLD

Dear colleagues

The V International Forum “Child in a Digital World” will be discussing the issues of child and youth development in conditions of digitalization of the modern society. The Forum is an interdisciplinary platform for scientific communication between researchers, practitioners, and teachers – all those who are interested in an understanding of childhood, meeting modern challenges and upcoming digital opportunities.

The Forum is held annually by the initiative of the Lomonosov Moscow State University and the UNESCO Chair in Early Childhood Education and Development, in cooperation with the Russian Psychological Society since 2021. The Forum received the auspices of the UNESCO.

In 2024, the Forum featured more than 50 speakers from leading universities around the world and was attended by over 10,000 specialists from more than 70 countries. Considering the global significance of the topic and importance of its discussion with the scientists and researchers from different countries, I invite you to nominate one or two speakers from your university to deliver a presentation at the Forum.

We would be happy to see speakers and attendees from all countries. And ask you to forward information about the Forum to your university community (see attached). Kindly send nominations with nominees' contacts before April 15, 2025, to forumdigitalchildhood@gmail.com

The Forum is held online. Participation is free of charge. All the presentations will be simultaneously translated into Russian, English and Spanish, and can be delivered in any of these three languages.

More information about the Forum can be found at <https://digitalchildhood.org/>
